How Get Influential People To Share Your Content & Send You Traffic

In this short and to the point report I'll show you a 'hack' to get influencers in your niche sharing your content and sending you traffic even when you have no existing relationship with them.

Go to Topsy.com. Enter your keyword or article subject into the search box.

Click 'Tweets' on the top of the search bar. Then hit the search button.

From the left hand column choose 'all time'

Topsy will now display Twitter users who have shared similar content based around the keywords you've entered.

Click on users to find out what size their audience is.

You can also speed up this process by choosing "influencers" from the left hand menu but sadly this doesn't always bring up truly influential people.

If you see they have a few thousand people on their account then reach out to them with a simple tweet

Something like...

"Hey I created a piece of content I know your audience will enjoy it's called 'X' and you can find it here. #RT"

People love to share quality content with their audience and will happily do so if it's good. Watch as your social shares skyrocket.

Go try it and report back. I've literally gained 500+ tweets to some of my posts in less than 7 days using this method.

How many do you think you'll new post will get?

Final Words:

As you can see that's just how easy it is to get influential people in your niche to share your content even though they have no previous relationship with you.

Do NOT be scared to suggest your content to them. Online marketers and bloggers LOVE to find great new content to share with their audience.

But remember your content has to be REALLY GREAT or this strategy will be a complete failure and you'll just make yourself look bad in front of the people you were trying to impress.

Everything you do online starts with great content otherwise all your other efforts are wasted.

So go out and try this proven strategy and report back on your results.

Thanks for reading.
